

Bar Code Analyzer

The **Bar Code Analyzer** is a portable data terminal that allows you to scan any 1D (Linear) or 2D bar code, and see the exact content of the code. This is very useful in QC applications to make sure of the exact parameters of the bar code being analyzed. This is a completely portable device that allows the user to scan bar codes at the point of activity. All analyzed bar code information is stored in the device and can be downloaded an Excel as a .csv file.

Features Include:

- **Display Bar Code Content-Including All Hidden Characters**
- **Display Bar Code Symbology Type**
- **Display Bar Code Length**
- **Record All Scanned Bar Codes and Results as a .csv file**
- **Unit Comes Complete with Lithium Ion Battery, Charging and Communication Cable and Carrying Strap.**

Decodes and analyzes:

UPC A and E	QR Code
ITF and ITF-14	Datamatrix
GS1-128	PDF417
GS1 Databar	See next page for complete list

1D Version *Call for price**

2D Version *Call for price**

*Complete with LIon battery, charging/communications cable and carrying strap.
