

Barcode Match™ ensures that two barcodes match each other. Use your smart phone to acquire a barcode and automatically compare scanned barcodes to make sure they match.

Makes a redundant job quick and easy.

Eliminates potential problems related to boredom, language differences or reading ability.

An inexpensive and simple Android App to eliminate expensive errors in:

- Kitting
- Order picking
- Fulfillment
- Packaging

Four Modes of Operation:

- **One to One** mode learns and compares one barcode and resets
- **One to Many** mode learns one barcode and compares as many as needed until user resets
- **Many to Some** mode: learn a set of barcodes (up to 50), compare some or all
- **Box Mode**: define and learn a specific set of items; test for the right items in the right quantity

Barcode Match™ utilizes your smart phone camera as a scanner. You can optimize the camera within the app to capture and match barcodes quickly and easily.

Barcode Match captures and matches these 1D and 2D symbologies:

Code 128	Code 39	Code 93	ITF	ITF-14	Codabar
UPC A	UPC E	EAN 13	EAN 8	ISBN	PDF-417
DataMatrix	QR Code	Aztec Code			

Barcode Match™ is available exclusively at the Google Play Store
